SKILLS

Technical Skills:

❖ **Frontend Technologies**	React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design
❖ **Version Control**	Git, GitHub, Advanced Excel
❖ **Tools and Frameworks**	React Router, Redux (basics), Bootstrap (for styling)
❖ **Development Practices**	Component-based architecture, Responsive Design

Soft Tech Skills: Strategic Problem Solver, Collaborative Team Player, Quick Learner, Proactive and Goal-Oriented, Resourceful Decision-Maker, Forward-Thinking.

PROJECTS

➢ **Gemini Clone Project using React - [Gemini GitHub Link] - [Gemini Vercel Live Demo]**
- Developed a Gemini clone application using React, implementing useContext for efficient state management to enable secure API key sharing and seamless integration of real-time cryptocurrency data fetched from Gemini's official API.
- Designed an interactive web application with React components, utilizing useState for search functionality and dynamic data updates, while enhancing UI responsiveness and ensuring code reusability through props.

➢ **Apple Website Clone [React] - [Apple Website Clone - GitHub Link] - [Apple Website Clone - Vercel Link]**
- Developed a responsive and interactive Apple website home page using React with modular components like Navbar, Hero Section, Product Grid, and Footer, ensuring clean code architecture and reusable functionality.
- Integrated CSS for styling and designed a grid-based layout for showcasing product offerings, emphasizing responsive web design principles for seamless user experiences across devices.
